

FIELD PROJET

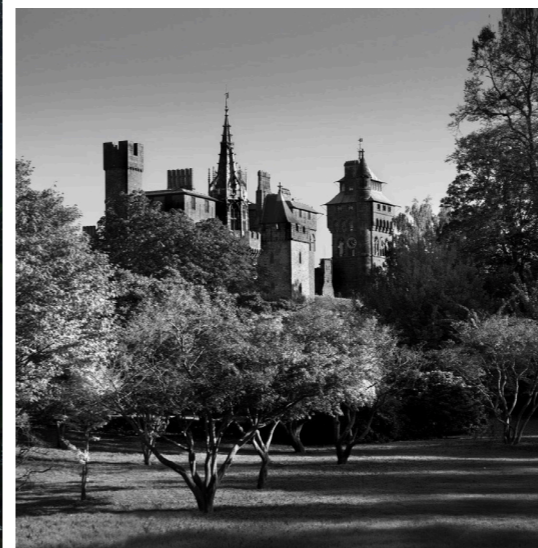

Emilie BAGNARD - Erasmus Student from France
Cardiff Metropolitan University - December 2018

MY
ICONIC
OBJECT

For my artwork the main structure represents my life since i'm here in Cardiff, I took the red cup we used my friends and I during our numerous party together. I choose this object because for me it is the most iconic object that I know, the one which reminds you, partys, friends, good memories, socialisation, laughing moments. It was important for me to do something links with my friends I met here. I think that my life in cardiff wouldn't be so pleasant without them.

MY SITE

The place that I choose to do my display is the Bute park. At the beginning I choose this place because it is an area that I have to cross every time when I want to go to the Uni or go somewhere in the city, for me it's an important place because it is where everything started at the beginning of my Erasmus life. I thought of the landscape, the nature and the natural lights which could be interesting into this place.

INSTALLATION

This weekend I went to the park with 3 friends of mine, Kathrin, Marvin and Audrey, like that we can be 3 to do the display and another one to take the picture during the sitting of the artwork up. It was really hard but funny to do it with my friends, we laughed so hard. It was a group work with my friends. I think it was a good idea to do it with my friends because the main meaning of my project is friendship.
